NOTES:

Prices effective 3/1/2015, subject to change

Vinyl and Composite railing posts listed above are sleeves. Structural post insert is needed (wood or aluminum).

Most Aluminum and wood railings have structural posts. Deckorators ALX-Pro is an aluminum sleeve.

Rail Simple cost includes top cap rail.

Cable Rail cost is 10 rows of cable for a 10' section. Cost per foot goes down as length goes up. Posts, caps and skirts are wood.

Where prices change for different colors and options, manufacturer's lowest price option was used.

Post prices are for 1 post. Typically over the entire deck, the number of posts needed is 1 higher than number of railing kits.
